MOBILYTE INDIA TECH PVT LTD.   FEB 2016 – MAY 2017

SOFTWARE ENGINNER GRADE-1

#TRUE TALENT

Project Summary: This software is to store data for US staffing, in which we manage all the process from adding a Candidate into the system onto getting that candidate placed for a particular Job. For user's better and easy usage, we have provided an option to parse the Candidate resume. We have also created the Windows based application, so that if user wants to upload resumes in Bulk then that window's application can manage and further add into our system. In this we have also created an option to get resumes from User's email, user just need to provide the email credentials and our system will read and add Candidates from that particular resume.

#HRMS (HUMAN RESOURCE MANAGEMENT SYSTEM)

Project Summary: Software to manage daily records for employees in regards to their attendance, leaves, occasions, timesheet, reports etc. Any notification/announcement for the change in policy/rules is circulated via this portal and it`s easy to manage from the backend as well. On hierarchy basis, the right to use HRMS varies as the team lead would have the right to approve/ reject a leave/late coming. Every employee`s profile is created with their personal details and they can view A user can view their timesheets, leave kitty, can apply for leaves/miss punch etc. On attendance basis, salary is calculated and the provided deductions/adjustments are also made, asset management for each individual.
